

Chemistry Comic Strips

Extra Credit

Directions: You now know enough chemistry to start recognizing it in everyday life. Comic strips are a great way to share your appreciation of chemistry with others. Use your knowledge, humor, and wit to entertain and educate your peers.

Rules:

1. The comics can be drawn or photographed.
2. They can be one or more frames.
3. They must be centered around a topic covered in chemistry
4. Make sure the picture is in the correct orientation.
