### Intro to Thermochemistry

#### Practice Sheet # 45

Demo	What is being done?	Observations	Questions
1	Touch the table part of your chair.	Observations: How does the chair feel?	
2	Touch the leg part of your chair.	Observations: How does the chair feel?	
3.	Teacher adds one piece of ice to the cutting board, and teacher adds one piece of ice to the cookie sheet.  Draw what is being done.	Prediction: Which piece of ice do you think will melt first?	Which piece of ice actually melted first?  Predictions: 1. Why do you think this happened?  2. Where may have you seen this type of phenomena before? How could this be useful for someone?  3. What would happen if we took the temperature of the cookie sheet and the cutting board?
4.	What's actually happening?
