

Name: _____ per _____

Unit 7 Gases: Review

Prep

Pressure

1. Calculate the pressure when 800 N of force is applied over 40 m².
2. Calculate the force experienced if 500 Pa of pressure is applied over a surface of 0.200 m².
3. Calculate the area if 2000 N of force create a pressure of 40 Pa.

4. Complete the following table.

Atmospheres (atm)	Millimeters of Mercury (mm Hg)	Pascal's (Pa)
	722	
1.10		
		1.36 x 10 ⁴

Dalton's Law

5. What is Dalton's Law?
6. A mixture contains carbon dioxide with a partial pressure of 3.45 x 10⁵ Pa and oxygen with a partial pressure of 6.75 x 10⁵ Pa. What is the total pressure of the mixture?
7. A mixture containing methane (CH₄) and oxygen has a total pressure of 0.78 atm. If the partial pressure of the methane is 0.34 atm, what is the partial pressure of the oxygen?

Boyles Law, Charles' Law, Gay-Lussac's Law and the Combined Gas Law

Directions: Give the name of the law used for each problem.

8. A sample of 1.2 L of neon at 0.75 atm of pressure is expanded to 4.5 L. What is the resulting pressure?
9. A balloon contains 1.48 L of air at 23 °C. What will the volume of the balloon be if the temperature is lowered to 17 °C?

Name: _____ per ____

10. A gas cylinder has a pressure reading of 1.80×10^5 Pa at 300 K. At what temperature will the pressure read 2.34×10^5 Pa?
11. A sample of oxygen occupies 150 mL at 2.4 atm of pressure and 480 K. What volume will the sample occupy at 320 K and 4.8 atm of pressure?

Avogadro's Law and the Ideal Gas Law

12. How many moles of neon are contained in 280 mL at STP? What is the mass of the neon? How many atoms of neon are present?
13. What is the volume occupied by 0.320 mol of xenon at 0.950 atm and 458 K?
14. What is the volume occupied by 90.0 g of water vapor at 9.80×10^4 Pa and 11 °C?

Gas Stoichiometry

15. Oxygen dichloride decomposes into oxygen and chlorine at STP.
- Write a balanced chemical equation for this reaction.
 - If 78.4 L of oxygen dichloride are present, what mass of oxygen and chlorine is produced?
 - If 78.4 L of oxygen dichloride are present, what volume of oxygen and chlorine is produced?
