

Dead Chemists Society

You have been assigned the ghastly task of inscribing the headstone of a chemist of times past.

Look up information in encyclopedias or the Internet.

Your headstone may *NOT* be on a flat piece of paper – it must stand on its own and resemble a real headstone!

List the following items on the headstone:

Full name of the chemist

Date (years) of birth and death

Nationality or Ethnic origin

Education or Positions held

Personal Life (family, ect...)

Contributions to Chemistry (at least 3)

Illustrations relating to research, work, or awards (4)

Picture or caricature

Works Cited (MLA format)

Choose any “dead chemists.” Search online or use the following link <http://famouschemists.org/>
